

Registering your account

Before you start, you must have:

- Received an email with the activation link
- The **Google Play Store** app installed on your phone
- A stable internet connection
- A phone with enough charge

1. To install the app from **Google Play Store**, open the activation email on your phone and tap **Download Application**.
2. Open the app.
The **Merchant sign in** screen opens.
3. Enter your **Merchant ID** and tap **Continue**.
The **Merchant ID** is provided in the activation email.
The **Enter password** screen opens.
4. Verify that the security image matches the one in your activation email.

If the image doesn't match:

- a. Uninstall the app.
- b. Go back to step 1.

If the problem persists, call merchant support.

5. Enter your activation password and tap **Continue**.
The password is provided in the activation email.
The **Create new PIN** screen opens.
6. Create a 6-digit PIN to secure your account and tap .
The **Confirm new PIN** screen opens.
7. Reenter your new PIN to confirm and tap .
The **Allow change screen timeout** dialog opens.

You may receive a notification to update the payment kernel. If you do:

- a. Tap **Update Now**.
- b. Tap **Done**.
- c. Enter your PIN

Allowing the app to access the screen timeout setting ensures that your transactions won't timeout unexpectedly. This helps you with having an optimal customer experience when accepting payments.

8. Tap **Continue**.
The **Device Settings** screen opens.
9. Toggle the switch **on** and go back.
The **Allow battery optimize opt-out** dialog opens.

Typically, to ensure your phone has enough usage time left, the device settings are optimized so that some apps running in the background are shut down automatically. This may have a negative impact when accepting payments. Allowing the app to opt out of optimizing the battery usage lets the app run in the background regardless of the battery usage.

10. Tap **Allow**.
A **Stop optimizing battery usage** dialog opens.
11. Tap **Allow**.
Once the registration is successful, the **Purchase** screen opens.

You're now ready to accept contactless payments with your phone!
